1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joshua Liu.

IN THE SPECIFICATION

The first paragraph of the specification has been amended to read as follows:

--This is a divisional of U.S. Application No. 09/794,131, filed February 28, 2001, now U.S. Patent No. 6,749,787, issued June 15, 2004 by the same inventors, and claims priority therefrom. This divisional is being filed in response to a restriction requirement in that prior application.--

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest a coated mold insert as defined in the claims of the instant application.

Art Unit: 1722

The closest prior art of Japanese Pub. No. 11-105039 (hereinafter "JP '039") has been described in the previous Office Actions. JP '039 fails to teach or suggest the mold insert as comprising an opening that extends from one end of the mold insert to an opposite end of the mold insert as recited in claim 1. Moreover, given the injection molding structure of JP '039, it does not appear as though the insert would be readily adaptable for such a configuration with an opening.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
